## 命令列表

Command Name	NetFn	CMD	Privilege	备注
chassis status			User	获取当前服务器状态
chassis restart_cause			User	获取服务器系统上次重启原因
chassis selftest			User	获取服务器系统自检结果
chassis policy always-				设置服务器系统电源恢复策略为 自动开
on/previous/always-off			operator	机/恢复到断电前状态/保持关机状态
chassis bootdev {device}			operator	设置服务器的启动项
power status			User	获取服务器系统电源当前状态
power on/up			operator	设置服务器开机
power off/down			operator	设置服务器关机
power reset			operator	设置服务器重启
mc info			User	获取服务器管理系统各个模块信息
mc selftest			User	获取服务器管理系统自检结果
mc reset cold			Admin	设置服务器管理系统冷重启
<u>sdr</u>			User	获取服务器所有传感器的部分信息
sensor list			User	获取服务器所有传感器的详细参数信息
<pre>sensor get {sensor-name}</pre>			User	获取服务器指定传感器的详细信息
<pre>sensor thresh {sensor- name}</pre>			Admin	设置服务器指定传感器的阈值
sel			User	获取系统日志信息
sel elist			User	获取系统详细日志记录
fru			User	获取现场可替换单元信息
session info active			User	获取服务器管理系统当前活跃用户的会 话信息
<u>User list</u>			User	获取所有用户信息
User set name {User id} {Username}			Admin	设置服务器管理系统新增用户名
User set password {User id} {password}			Admin	设置服务器管理系统指定用户的密码
User test {User id} {16 20} {password}			Admin	验证用户名密码的正确性
User disable {User id}			Admin	关闭指定用户的服务器管理系统的访问 权限
User enable {User id}			Admin	开启指定用户的服务器管理系统的访问 权限
User priv {User id} {privilege level}			Admin	设置指定用户的服务器管理系统访问权 限

#### chassis selftest (获取服务器系统自检结果)

Command	chassis selftest 命令用来获取服务器系统自检结果	
Description	Chassis sentest 叩令用木犾以服务益糸统目位结果	
Privilege	user	
Command	lenovo:~# ipmitool -H [BMC_IP] -U USERID -P PASSW0RD -I lanplus	
example	chassis selftest	
	Self Test Results : passed	

# chassis policy always-on/previous/always-off(设置服务器系统电源恢复策略为 自动开机/恢复到断电前状态/保持关机状态)

	chassis policy 命令用来设置服务器系统电源恢复策略。		
Command	支持三种策略:		
	1. always-on 当服务器电源接通后系统会自动启动		
Description	2. previous 当服务器电源接通后系统恢复电源拔出前的状态		
	3. always-off 当服务器电源接通后系统保持关机状态		
Privilege	operator		
Command	lenovo:~# ipmitool -H [BMC_IP] -U USERID -P PASSW0RD -I lanplus		
example	chassis policy state		
	<state>:</state>		
	list : return supported policies		
	always-on : turn on when power is restored		
	previous : return to previous state when power is restored		
	always-off : stay off after power is restored		

#### chassis bootdev {device}(设置服务器的启动项)

Command Description	chassis bootdev 命令用来设置服务器系统一次性启动选项
Privilege	operator

## sol activate(激活 SOL 功能)

Command	sol activate 命令用来激活 SOL,
Description	sof activate 即文用未放在 SOL,
Privilege	administrator
Command	lenovo:~# ipmitool -H [BMC_IP] -U USERID -P PASSW0RD -I lanplus
example	sol activate usesolkeepalive
	[SOL Session operational. Use ~? for help]

## sol deactivate(关闭 SOL 功能)

Command	sol deactivate			
Description	soi deactivate			
Privilege	administrator			
Command	lenovo:~# ipmitool -H [BMC_IP] -U USERID -P PASSW0RD -I lanplus			
example	sol deactivate			

下列命令是 Lenovo BMC 支持的 OEM RAW 命令。

### Get SNMP Trap Info (获取 SNMP trap 信息)

Get SNMP TRAP INFO (netfn=0x30, cmd=0x02)		
	byte	data field
	1	user ID this value is from 01h to 05h.
Request Data	2	parameter  01h - enable  02h - severity  03h - version  04h - mode  05h - community  06h - user  07h - user encrypt  08h - password  09h - pass encrypt  0Ah - distination IP  0Bh - port

		0Ch - lan channel
		0Dh - enter ID
Response Data	1	Completion code
•	1	00h - disable
for parameter 01h	2	01h - enable
OIII	1	
D D .	1	Completion code
Response Data		severity
for parameter	2	01h - critical
02h		02h - critical and warning
		03h - all
	1	Completion code
Response Data		version
for parameter	2	01h - v1
03h		02h - v2c
		03h - v3
Response Data	1	Completion code
for parameter 04h	2	mode
Response Data	1	Completion code
for parameter 05h	2:17	community
Response Data	1	Completion code
for parameter 06h	2:17	user
В В	1	Completion code
Response Data		user encrypt
for parameter	2	00h - user encrypt
07h		01h - user non-encrypt
Response Data	1	Completion code
for parameter 08h	2:17	password
D D	1	Completion code
Response Data		password encrypt
for parameter	2	00h - password encrypt
09h		01h - password non-encrypt
Response Data	1	Completion code
for parameter 0Ah	2:33	deatination IP
Response Data	1	Completion code
for parameter 0Bh	2:3	port
Response Data	1	Completion code
		I = =

for parameter 0Ch	2	lan channel
Response Data	1	Completion code
for parameter 0Dh	2:33	enter ID
Command example: # ipmitool -H 10.109.107.160 -U USERID -P PASSW0RD -I lanplus raw 0x30 0x02 0x02 01		
01		

## Set SNMP Trap Info(设置 SNMP trap 信息)

SET SNMPTRAPINFO (netfn=0x30, cmd=0x03)		
	byte	data field
	1	user ID
		this value is from 01h to 05h.
		parameter
		01h - enable
		02h - severity
		03h - version
		04h - mode
		05h - community
	2	06h - user
	2	07h - user encrypt
		08h - password
		09h - pass encrypt
Paguast Data		0Ah - distination IP
Request Data		0Bh - port
		0Ch - lan channel
		0Dh - enter ID
	3	below value for parameter 01h:
		00h - disable
		01h - enable
		below value for parameter 02h:
		01h - critical
		02h - critical and warning
		03h - all
		below value for parameter 03h:
